# <u>Design a Student Website</u>

**<u>Directions:</u>** Using your student (Gmail) account, log onto **<u>sites.google.com</u>**. Fro there, you can select the classic or new view to <u>create your new website</u>. Make sure to use multiple pages. Your original page should be your **HOME** page. Include multiple page links on your website to other pages that you create. Try to see what others use on their home pages/websites to get ideas. Also, try to promote school pride! Be creative, include appropriate photos, make sure everything blends together and it looks like a REAL website ( not thrown together). *You may even look at different teacher websites for ideas*

**<u>Topic:</u>** Create a Student Website

**<u>Page Ideas;</u>**
- <u>About Me</u> – Tell the viewer some information (not too much or too personal!) about yourself.
- <u>Student Work</u> – Include some of your work that you have completed in school such as essays, art projects, technology projects, and presentations. Be proud of yourself and show others!
- <u>Pictures</u> – Some students in the past have included a photo gallery of their interests. Some have also create a MEME page of their favorite (AND SCHOOL APPROPRIATE) memes. Be creative.
- <u>Videos</u> – This may be difficult in school, but you may want to include some of your favorite youtube videos. Perhaps just 3-5.
- <u>Music</u> – Some students had included their favorite artists with a playlist or videos of their favorite – clean – songs.
- <u>Games</u> – Some students even included a page on their website devoted to their favorite school games. You can actually link/embed certain games to be played directly from your website.

**These are just ideas and you do not need to include any/all. Take a look at what some others are doing for your own ideas

Good luck! Make it educational, aesthetically pleasing to the eye, and please be creative. When completed, please email the website's link address to me at jgrybos@indians.k12.pa.us
