

Section: Narratives - Needs Assessment

Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the Return on Investment of Summer school Programs in Pennsylvania study determined that for every dollar invested in summer school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link PSAYDN.org](#)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three-part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

Section 1 - Needs Assessment: In this section, LEAs are asked to describe the impact of the pandemic on their students since March 2020.

Indicators of Impact

1. Describe how the LEA identified students for inclusion in a summer school program. Include a brief description of the indicators used in the decision-making process.

Administration and teachers identified students using their quarterly grades, benchmarks and assessments to identify students from low income families. At the elementary, we are using Acadience, IReady, and quarterly grades. At the intermediate and middle schools, we are

using IReady and quarterly grades. At the high school level we are using CDTs and quarterly grades. Each school will focus in the areas of Math and ELA. These assessments listed will be done at least 3x per school year. We will also use attendance records and SEL referrals. The data will be analyzed and disseminated to identify students in our groups. These students will receive additional targeted assistance during a summer program. Through continue monitoring of quarterly grades and these assessments we will be able to measure the impacts of the additional targeted services being provided to these students. Between assessments, progress monitoring will be implemented at the appropriate grade levels for continual monitoring.

Section: Narratives - Summer School Program Questions

Summer School Program Questions: In this section, LEAs are asked to describe the activities they have designed to provide summer school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children with Disabilities	Academic Growth	64	To identify students the district sent a survey to all specaled parents to determine who would be interested if the summer school tutoring program, After survey completed, supervisor will analyze survey data, teacher recommendations and progress monitoring of iep goals to determine who will be selected. impact will be measured by progress monitoring of targeted skills in the area of reading and math.

3. Describe the evidence-based resources that will be used to support student growth during the summer school program.

iready- is an on line program for reading and math that will personalize their learning and monitor progress. Heggerty bridging the gap skills; phonemic awareness; explicit phonics and implicit; ixl math 7-12;- personalized instruction, xtra math- on line math fact fluency program that assist students to develop quick recall and automaticity of basic math facts. k-6;enhanced

core reading instruction; wonder works- supplemental program to core reading program.

4. Describe the staff that will provide the summer school program (i.e., internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
6	Internal Provider	We estimate 6 tutors will be needed to provide summer tutoring session for 5.5 hours per day- 4 days week for 4weeks- total hours of tutoring for three years will be 1601.5 hours at \$30 plus benefits.

a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.

b. The LEA assures it understands it is responsible to ensure that all summer school program staff hold the appropriate certifications for the program that is being delivered.

5. How will the LEA assess the success of the summer school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
I ready benchmarks	4	growth from comparison of spring iready results to conclusion of summer program; I ready is being administered 3 x during school year to the elementary; An additional benchmark will be administered to the students with disabilities attending the summer program.

6. How will the LEA engage families in the summer school program?

A survey to learn interest of the families wishing to participate. I ready video will be placed on district website to explain how to read/understand the iready report. This written report will be given to parents at the end of summer tutoring sessions that has the child's progress and growth. All reports are individual student reports.

Section: Budget - Instruction Expenditures

Instruction Expenditures

Budget
